

Project Leadership Mastery

BOOK NOW on
(03) 9733 0554

Are major business projects a critical factor in reliable implementation of your organisation's strategy?

Do you aspire to be an organisation that is recognised as a pace-setter and/or peak performer in project management?

or, perhaps,

You simply need to reduce the current cost to your business of Project under-delivery?

Recent research results across numerous project & business analyses within organisations throughout the world point to the importance of and need for strategic project leadership skills.

The most successful organisations are those who have their senior project directors & managers provide clear and influential strategic leadership across their projects – these are leaders who understand, motivate and build an optimal level of cohesion among their widely dispersed teams, to leverage the group's collective intelligence & enable exceptional performance.

Program Overview

Stage 1: Skill Scan COMMENCES October 2009

Incorporating psychometric tools & customised scenario - accessed online – reviewing technical, interpersonal & leadership skills. Stage 1 informs program content and personal plan.

Stage 2: Residential Workshops

Two incredibly intensive, challenging residential programs

Residential 1 – Thursday & Friday 19-20th November 2009

Module 1: “High Impact Project Leadership”

Residential 2 – Thursday & Friday 3-4th December 2009

Module 2: “The Business of running Complex Projects “

Stage 3: 90 day Personal Edge Plan

Providing on the job coaching to further embed & support the workshop learning & experiences into real personal and business benefits.

Who is it designed for?

Project Leadership Mastery is designed for senior managers and senior, highly skilled project Directors currently responsible for multiple, mission-critical business projects.

Facilitated by global experts:

ROB THOMSETT, internationally renowned Australian author of a number of books on Project Management & **DR. PETER FULLERTON** Consultant to some of Australia's Top 10, on their mission-critical project

“While certification is a good foundation for knowing what to do, it takes true leadership to drive complex projects to successful conclusions.”

Dr. Karen McGraw

*Founder & Chief Knowledge Officer
Cognitive Technologies. June 2009*
