

Project Leadership Mastery

About the Residentials

The selection and location of the two residential components of the program are critical to the program's success.

We understand that participants are very busy people with heavy work demands so, we have deliberately structure the program in two residential blocks to ensure each participant and their working group has the time and space to focus on the program goals and how they relate back to their own workplace situation.

The venue (while yet to be announced) will be of 5 Star standard and will provide the space and peaceful atmosphere that will encourage your learning.

Our policy is to select easily accessed venues within 50Kms of the City.

We will announce the location here in the first week in October.
