

Project Leadership Mastery

Testimonials from previous course participants

The biggest impact of 'Mastery' for me was...

... Greater awareness of the impact of communication and stakeholder management, & that these are living things, to be continually worked on... realise if you have everything else and lack these, your project will fail.

"Mastery covered in 2 days the equivalent of 2 years of on the job learning. We worked on our own 'projects' as well as referred to external stories

I now regularly catch myself and force myself to think in 3rd position... so I identify the drivers of issues, rather than react to the symptoms

Mastery gave us the chance to question, improve and extend our processes and approaches.

I am now better prepared to manage the host of communications and politics in running a program; to manage the 'noise' and strategise more & be comfortable in delegating and holding people accountable"

...perfect timing for me! I had low stakeholder engagement despite my best efforts. I applied Mastery tools and approaches – there was a complete engagement turnaround – something I thought would never happen!

I now understand my personal triggers. I have fine-tuned the way I lead & approach problem solving. I have improved my influencing and motivating of key stakeholders

I am a Business Sponsor and have applied Mastery approaches directly to the project as a 'live case- study'. It worked extremely well! My advice: use the approaches right from the start to gain max benefit

"... I thought this would be like any other course but it made me dig deeper & think harder. It was the best program I have ever been involved in"

The skills scan was spot-on as a diagnostic... not that I appreciated the truth at first! It showed me what I needed to work on. The workshops and 90 day edge allowed me to learn & practice on the job
